

## ABOUT CYRIAS:

With offices in several French cities (Palaiseau, Nantes, Bordeaux, Montpellier...), CYRIAS, a consulting and integration company, supports its clients in France and abroad on projects to digitize their purchasing and finance functions.

With a team whose expertise is recognized by the market, we rely on the knowledge of each of our employees to analyze, advise and implement the best solutions on the market. We do everything possible to improve our clients' performance in the long term.

In order to support our strong growth, we are looking for IT Project Managers (M/F) in our different offices.

**IT PROJECT**

**MANAGER**

**(M/F)**

## PROPOSED MISSIONS

After a complete training on the leading cloud solutions on the market, you will participate in large-scale projects within international groups.

As part of a team of enthusiasts and with the support of a Project Director, you will manage the customer projects entrusted to you and will be involved in all phases of the project. You will participate in the following missions:

- Frame and plan the implementation of projects.
- Assist in writing functional and technical specifications.
- Manage the daily supervision of your project portfolio (progress of ongoing tasks, adherence to schedule, readjustment of delivery dates, proposal of solutions, implementation of solutions, project budget monitoring) in collaboration with your Project Manager.
- Manage and coordinate the stakeholders associated with the projects.
- Manage the design, implementation, testing and deployment phases. Write functional test plans and non-regression tests.
- Prepare and lead steering and coordination meetings.
- Ensure the follow-up of the evolutionary and corrective maintenance.

## PROFILE REQUIRED

- You are autonomous, methodical, organized and have a good capacity for analysis and synthesis.
- You are a team player and a good listener.
- You have an interest in software and new technologies.
- You are used to project approaches and methodologies and do not hesitate to take up the challenges that arise.
- Professional experience in an international context and as an ERP project manager (SAP, Oracle etc.) is desired.
- With an engineering or IT project manager background, you have a first significant experience in a similar position.
- Proficiency in professional English is mandatory.

## WHAT WE OFFER

- Attractive fixed/variable compensation package, PEE, RTT Syntec, Tickets restaurants.
- Participation in well-being and health by paying part of your gym membership.
- Support for green mobility solutions (electric bikes, etc.).
- Hybrid work mode (office/telework).
